TRAINING CALENDAR 2026

Last Updated: 04.06.2026

In-House Training ****Request for more information.*

AI TRANSFORMATION MASTERY [1 DAY]

To equip managerial and leadership teams with a foundational understanding of fundamental of AI and Gen AI tools utilisation, enabling effective strategic adoption for enhanced operational efficiency.

TIKTOK LIVE COMMERCE TRAINING [1 DAY]

This course offers a complete introduction to live commerce on TikTok Shop. It covers essential topics such as account setup, platform, compliance, live stream preparation, effective presentation flow, and a strategic approach to engaging and converting viewers. Participants will also gain practical experience by conducting live streaming sessions, followed by feedback and interactive discussions to enhance their skills and confidence in using TikTok Shop for sales and marketing.

AI VIDEO CREATION MASTERCLASS [2 DAYS]

This comprehensive AI Video Creation course is designed to equip participants with the knowledge and practical skills needed to leverage AI in video production. The course covers the fundamental differences between traditional and AI video creation, introduces key AI tools and platforms, and provides hands-on experience in creating and editing videos using AI. Participants will also explore case studies of successful AI video projects, learn about the role of digital humans in video content, and practice creating their own digital avatar.

CONTENT CREATION & STORYTELLING FOR DIGITAL PLATFORM [1 DAY]

An 7-hour workshop designed to help new Digital Platform users to start crafting their Digital Platform profile. Through interactive sessions, real life examples and frameworks, participants will learn how to improve their Digital Platform profile as part of personal branding, marketing and networking strategies.

ICES-AI

This 3-day hands-on bootcamp introduces beginners to the core concepts and practical skills of Artificial Intelligence and Machine Learning. Participants will learn how to collect, clean, and analyse data, build predictive models, and deploy AI solutions using Python and modern frameworks. By the end of the course, they will be equipped with the essential skills to begin their journey as an AI Engineer.

SANGFOR

Sangfor Technologies is a leading global vendor of IT infrastructure solutions, specializing in Cloud Computing & Network Security with a wide range of products & services including Hyper-Converged Infrastructure, Virtual Desktop Infrastructure, Next-generation Firewall, Endpoint Protection, Secure Web Gateway, Network Detection & Response, Secure Access Service Edge, Anti-Ransomware, Managed Detection & Response, and many others.

RUIJIE

Ruijie Career Certification covers ICT fields such as routing, switching, and wireless, providing a training system and certification standards to a begin ICT talent ecology. Ruijie product certification is designed to help you understand Ruijie product types, typical usage scenarios, and the main technical functions involved.

SANGFOR

Alibaba Cloud Training is a comprehensive program designed to equip professionals with practical cloud computing skills using one of the world's leading cloud platforms. The training combines instructor-led sessions, e-learning, and hands-on labs to help participants understand core Alibaba Cloud services, architecture, security, networking, and emerging technologies such as AI and big data. It also prepares learners for globally recognized Alibaba Cloud certifications.
